Firstly thank you for registering your interest in One Punch Awareness Week. This week our aim is to create as much awareness as we can about One Punch and a very important place for us to do that is in schools. To date we have spoken directly to over 56k young people but due to covid we have been restricted from going into schools and other places like youth groups etc. We are now beginning to get ourselves prepared to deliver our amazing educational workshop again.

One Punch Awareness Week is in its 4th year and each year its getting bigger and bigger, when a school registers to take part in the week with us we will provide posters, fact sheets, and a video to help to talk direct to your children to help them understand just what One Punch can do.

We as a charity have first-hand experience after losing our son Kristian to a One Punch Attack and sadly, we have a lot of service users / families that have gone or going through the same experience.

One Punch victims are left with life changing injuries or sadly pass away.

We aim to educate as many people as we can.

Register your school @ onepunch.org.uk/awarenessweek
